- 4- Goals of ETG
- 5- Markets & Exchanges

The Future Of Payments

1- What's ERC20 ?

The Ethereum token standard (ERC20) is used for Ethereum smart contracts. Developed in 2015, ERC-20 defines a common list of rules that an Ethereum token has to implement. Giving developers the ability to program how new tokens will function within the Ethereum ecosystem.

The Future Of Payments

2- Abstract about ETG

Bitcoin better than Gold and people were waiting the Bitcoin Gold next few days, how about ethereum ?

We are created (ETG) to prove the power of the Ethereum comparing with GOLD.

a) What's ETG:

ETHEREUM GOLD is new ETHEREUM smartcontracts governed ecosystem that applies blockchain technologies using the value of GOLD.

b) Why ETG ?

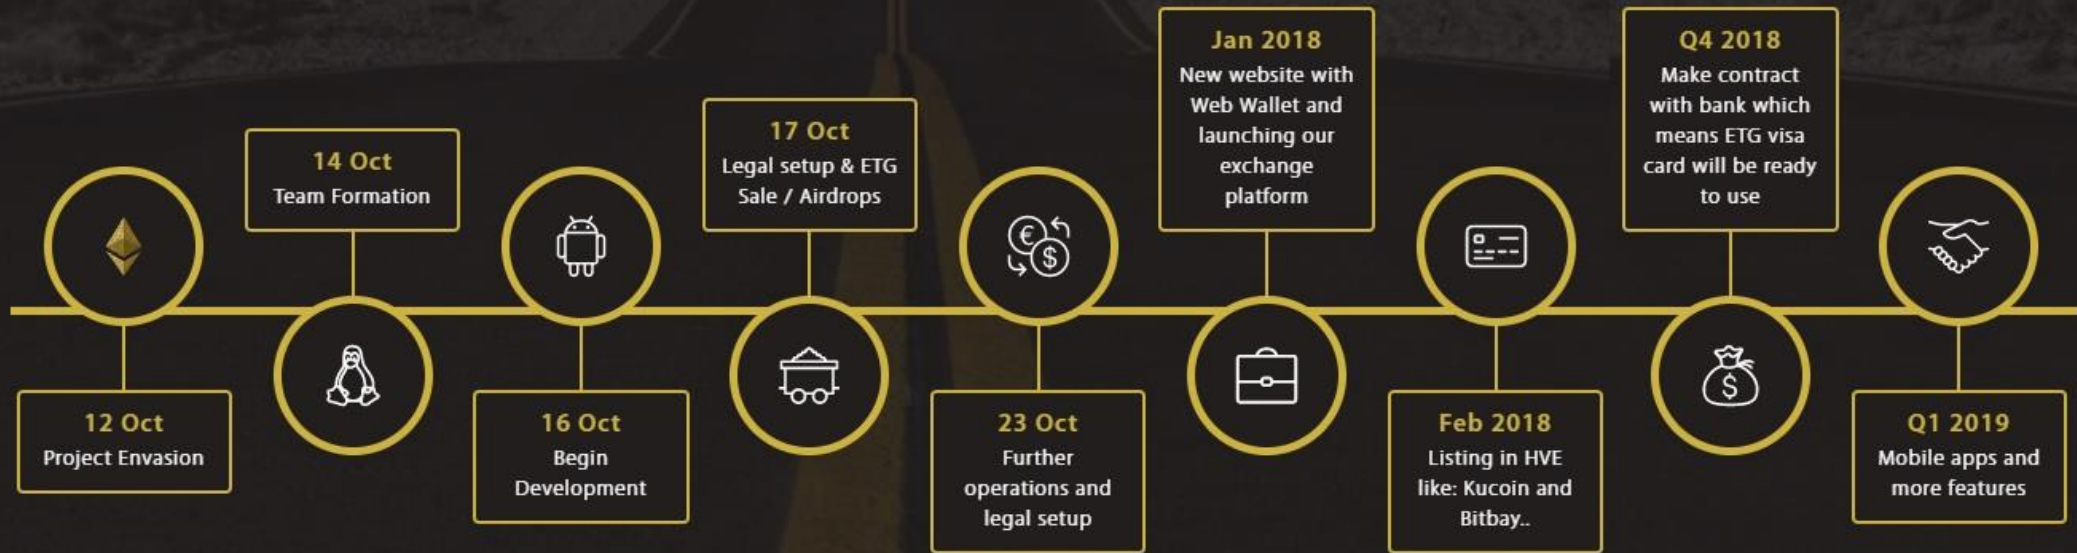

ETG is so faster, smarter and cheaper than Bitcoin because it's on Ethereum blockchain. So ETG helps people those suffer the delay and lost of transactions.

The Future Of Payments

3- ROADMAP

Roadmap

The Future Of Payments

4- Goals of ETG

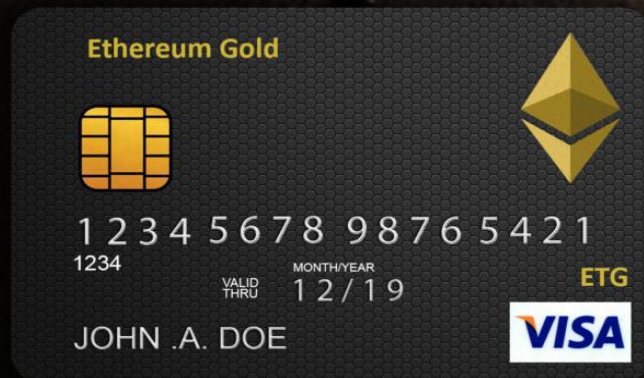

- Facilitate the transaction process and be more secure.
- Create our platform exchange to manipulate ETG price against dumpers and we'll make that ETG exchange vast with including other coins / tokens.
- Trying to make a contracts with many comapnies to buy from it directly with ETG (Google /Apple/Amazon/others.....).

The Future Of Payments

Q4 2019

- Contracts with banks let us distribute ETG visacard.
- Mobile applications to facilitate payments
- More features .

The Future Of Payments

Our Team

- Pablo Lee : Founder & CEO
- Amanda Frendely : Marketing Manager
- Jonson Picaso : Financial Advisor
- Jahanzaib Khalid : Designer & Developer

The Future Of Payments

More informations:

Contract : 0x28c8d01ff633ea9cd8fc6a451d7457889e698de6

Max supply : 24 000 000 ETG

Decimals : 0

We are live on : Coinexchange / Etherdelta
