GREETINGS FROM THE CO-FOUNDER

I am James Baptist, a committed person with strong passion for the information and technology market who is always on the lookout for new trends in the financial world. I have joined forces with some partners to design an innovative and revolutionary project.

Nasdacoin Project is structured with the best features of the two universes, the cryptocurrency market and the affiliate market. Our performance is committed to the total transparency and professionalism to the same standards of an authentic cryptocurrency, but using the power of duplication on the Affiliate Program to achieve unprecedented results in an international project, totally safe and sustainable.

Designed to generate satisfactory and sustainable income for visionaries entrepreneurs, the Nasdacoin Project is not confined by barriers between the two worlds ... Those who only want to trade our NSD currency enjoy the security and Blockchain Technology, with fast and secure transactions, as well as being able to trade in several exchanges using our currency. For those people with a more daring profile and the power of duplication, our Affiliate Program provides extraordinary income, using a system developed with professionalism and total security, ensuring that your work is always optimized to the maximum. Our Project has already achieved an international level of expression and safe operation environment. The power of our Affiliate Program will certainly be the catalyst of Nasdacoin strength as a reference in the international market.

Welcome to the Nasdacoin universe!

JAMES BAPTIST

Co-Founder Nasdacoin Project.

WHAT IS NASDACOIN™?

Nasdacoin is an encrypted and decentralized virtual, open source, peer-to-peer currency, developed with the script algorithm in the POW/POS Hybrid format, allowing people with entrepreneurial and passionate financial and technological market profile to store and invest their wealth in a safe currency not controlled by any government and even earn a substantial amount of interest on the investment.

Nasdacoin can be mined by anyone anywhere in the world using Asic mining or Rig CPU/GPU through Naspool (naspool.com). People who do not have any technical knowledge or mining company can opt for mining POS acquiring NSD and storing in a Windows Wallet for a minimum period of 15 days.

As a growth strategy for our community, we offer the Affiliate Program. When used wisely this NSD tool can help turn our community into one of the biggest on the cryptocurrency market on a very short time.

NASDACOIN TECHNOLOGY
