**nDEX Network** is a blockchain development start up that seeks to provide for the entire blockchain community, robust exchange platforms both centralized and decentralized to give the community a mixed sensation of both centralized and decentralized trading experience while at the same time providing a fun-enabled platform where users get to showcase their gaming skills and catch immense fun. The platform operates on a triangular platform; first is nDEX Market, Blockroll and nExbit.

## Core project

The platform operates on a triangular platform;

**nDEX Market**

**BlockRoll**

**nEXBit**

## Project Description & Mile stone

1. **nDEX Market** is a decentralized Ethereum tokens exchange developed to offer users security, speed and flexibility of decentralized trading platform. By design, nDEX Market is similar and operates like the conventional \*\*\*deltas, but comes with a more speed of transaction, security and a friendly user interface (UI). (<https://ndex.market>)

2. **BlockRoll** is an Ethereum smart contract based dice game platform (<https://blockroll.fun>). The platform is set to offer nDEX community a decentralized dice gaming experience, with the web and app (google play) version of the platform nearing completion (75% completed) and expected to launch by the end of October, the entire community are on a fun-filled journey that would revolutionize peer—to—peer dice gaming.
