

PEACH FINANCE

**THE PEECH TOKEN, WHITEPAPER
11:00AM, MARCH 27 2021**

A DEFI COMMUNITY-BASED MEME COIN

A token without complicated economics. One that is community-sourced that stands to grow through some of the darkest places on the blockchain. It is not a Phoenix from the ashes, but a **juicy peech** grown by the community members.

Decision driven. Open. From the roots up!

TOKENOMICS

Peech token is an **ERC-20 token** and a total of 1 Trillion tokens (1000 Billion) were minted. 600 Billion (60%) of the Peech tokens are in circulation and 400 Billion (40%) are under "Peech Control". This 40% is locked and split into several timelocks on Trust Swap (Team Finance): There are 4 separate locks and only one will unlock at a time if needed. The locked tokens are used for the giveaway / burn events, marketing, development, charity and liquidity.

HOW IT WORKS

Locked wallets give Peech the ability to give back to the community while giving peace of mind that the tokens are safe and locked away. The supply held in the wallets also give the project various options as to what those tokens could be used for in the future, whether that be needed liquidity for future exchanges or tokens used in the form of a utility.

GIVEAWAY/BURN STRUCTURE

The live giveaway/burn event will take place twice per week with the starting amount fixed to 0.1% of the giveaway/burn fund. Every event the possible percentage decided by the verifiable randomizer increases by 0.01 (0.1%, 0.2%, 0.3%, etc) to a cap of 2.5%. There will be a burn and giveaway every event, the percentage decided by randomization decides how much will be used for the event (If 0.9% is decided on GA# 9 then 1.8% will be used, 0.9% burn and 0.9% giveaway). 0.1% is deducted on top of the giveaway/burn amount every event to be used for the monthly charity donation.

APPROX PAYOUT STRUCTURE BELOW IS BASED ON THE MAX PERCENTAGE HITTING EVERY EVENT.

Giveaway wallet balance after 1 year is 8,873,510,600 with a max payout/-burn combined of 443,675,530 Peech. (If the maximum % was decided for 104 events).

A truly community-sourced token is our perspective of a true meme coin. Through polls and community feedback, we will use the data to help make decisions on the future path of Peech. Members have a direct impact on the direction of the token and the community.

We are a team of cryptocurrency enthusiasts that have witnessed too many problems in the meme coin space and we aim to fix that problem by offering investors a safe space to buy and hodl.
