01 INTRODUCTION

- 1.1 Our Story
- 1.2 Our Values
- 1.3 Our Mission

»» INTRODUCTION

1.1 Our Story

Inspired by the growing silver Short Squeeze movement, Silver Stonks was created to encourage everyone to diversify into digital and hard assets, specifically silver, because of its utility and price accessibility. The silver market is greatly undervalued, making it a great hedge against inflation. Silver Stonks is a company powered by its own token, SSTX, created to make it easier for a wider demographic to protect and diversify their assets.

The Silver Stonks ecosystem allows holders to buy physical silver on our e-commerce store, earn NFTs with the purchase of certain silver products, earn up to 12% APY with staking, and gain memberships to access exclusive educational content on their platform. Silver Stonks is leading the way to encourage the average investor to protect and diversify their assets through digital and hard assets.

1.2 Our Values

- Leading by example through transparency and innovation, to make a positive impact in society.
- Setting the bar for each business to bring real utility and value to the token economy.
- Creating a community where everyone can join the adventure.
- Delivering financial freedom through education, to empower everyone to make smart, financial decisions.
- Fostering creativity and innovation to pave the way for the next generation of business.

1.3 Our Mission

- To make investing in silver more approachable to a new generation of investors.
- To educate people about the benefits of diversifying their assets, particularly in investing in digital and hard assets.
- To grow our token's utility centered around an ecosystem of services that holders benefit from.

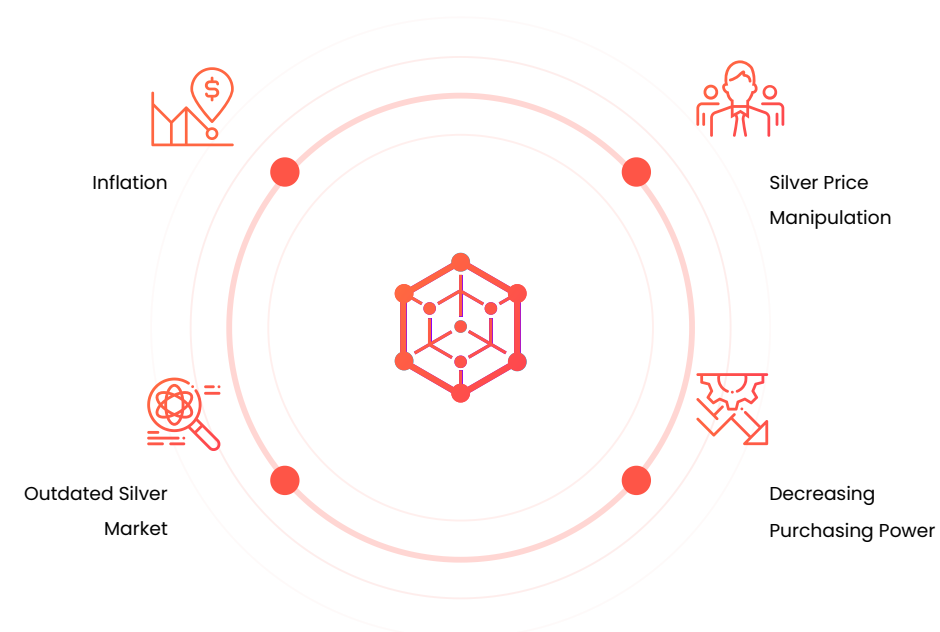

The background of the slide features a solid red color with a subtle pattern of large, detailed leaves. In the top-left corner, there is a white network diagram consisting of several nodes connected by lines, forming a triangular and polygonal structure.

02

THE PROBLEM

» THE PROBLEM

35% of all U.S. Dollars that have ever been printed into existence were printed this past year. The average consumer is unaware of just how much at currency is depreciating, leaving them vulnerable and unprotected. To protect their wealth, investors should invest in silver since it is a hard asset that is accessible and has a growing demand.

- Increasing inflation leads to decreasing purchasing power for the average consumer.
- The price of physical silver is manipulated and undervalued. However its price accessibility and increasing demand and utility make it a great long term investment.
- The traditional silver market doesn't appeal to a younger demographic of investor

03 THE SOLUTION

- 3.1 The Silver Short Squeeze Movement
- 3.2 A Growing Silver Stonks Ecosystem
- 3.3 Our Token Creates Awareness
- 3.4 Mass Token Adoption

» THE SOLUTION

Silver Stonks combines the new era of crypto with the traditional silver market. We are dedicated to making silver more approachable to a new generation of investors. Holders will be able to purchase silver directly on our e-commerce store by using our token, and will benefit from our growing ecosystem of services.

3.1 The Silver Short Squeeze Movement

Price manipulation through COMEX futures contracts by a group of large banks have kept the price of silver artificially low, even in the face of bullish fundamentals. A new movement has been growing for the average consumer to aggressively invest in silver, to drain whatever supply there is on the market, and force the short sellers to cover their positions, to initiate a short squeeze.

3.2 A Growing Silver Stonks Ecosystem

By holding our token, you join the Silver Stonks ecosystem. As we increase our token's utility, holders will benefit from a variety of services, not only the ability to buy silver. Our ecosystem will expand to provide financial education, market analysis, business consulting to help shape the token economy, and help our holders protect their wealth and diversify their assets.

3.3 Our Token Creates Awareness

Silver stonks makes the process of buying silver more approachable to a wider demographic. We created our own crypto token, SSTX, on the Binance Smart Chain. Members will be able to purchase our .999 fine silver bars and rounds which are customizable, as well as other unique products, using our token, SSTX.

3.4 Mass Token Adoption

We will partner with larger bullion dealers to accept SSTX as a form of payment. This increases the token's utility and gives holders more options. Silver Stonks is in a unique position, since we are one of the first businesses to adopt a token ecosystem, while making it more popular and approachable to invest in silver.

The background of the slide features a dense pattern of green leaves, likely from a tropical plant, with prominent veins. Overlaid on the left side is a white network diagram consisting of several circular nodes connected by thin lines, forming a web-like structure.

04 OUR TOKEN

04

OUR TOKEN

>>

OUR TOKEN

SSTX is a token created on Binance Smart Chain. Users can buy the Silver Stonks token (SSTX) on PancakeSwap. We created 2.3 trillion tokens, representing the total amount of grams of silver in circulation around the world as well as the estimated amount that is left to mine. We will burn tokens quarterly, until we reach 100 billion tokens, which represent the approximate amount of grams of .999 fine silver that exists in the world.

Token holders can use our token to purchase physical .999 fine silver, as well as other products on our website. The benefits for holding the token and its deationary properties give every single Silver Stonks member an incentive to spread the use of the token as much as possible. As adoption for the token increases amongst other bullion dealers, its utility will also increase.

05

BENEFITS OF SSTX

5.1 A Growing Silver Stonks Ecosystem

» BENEFITS OF SSTX

Silver Stonks was designed to promote long term ownership of its token. Holders receive a variety of benefits that will continue to increase as its ecosystem expands

Reflections

Every trade that takes place contributes towards automatically rewarding investors for holding their tokens. Investors will grow their net-worth in Silver Stonks, just by holding the tokens in their wallet.

Membership

Be rewarded for being a holder of Silver Stonks. There are different membership levels that holders will benefit from. As we grow our ecosystem, holders gain increasing benefits and utility for holding Silver Stonks.

Staking

Earn more SSTX through bonus staking. The APY is variable and based on membership levels.

Purchasing Power

Token holders will be able to use SSTX to buy physical .999 fine silver on our website as well as other unique products and services.

Deflationary

Manual burns will reduce the total supply of Silver Stonks tokens and will help increase the token's scarcity.

Automatic Liquidity Pool

Every trade contributes towards automatically generating liquidity for exchanges, so that the token is readily available.

Dedicated Team, Locked Liquidity

Our team is very bullish on physical silver and dedicated to the Silver Stonks project. We have a small team wallet with the majority of tokens vesting over a period of 36 months.

5.1 A Growing Silver Stonks Ecosystem

To grow our token's utility, we are creating an ecosystem of services that holders will benefit from. We want to educate people about the benefits of diversifying their assets, particularly in silver and cryptocurrencies, as well as focus on services that promote entrepreneurship.

TOKENOMICS

6.1 The SSTX Token

6.2 Silver Stonks Redistribution

»» TOKENOMICS

See how our token works

6.1 The SSTX Token

Silver Stonks' token has a 5% fee for each transaction. Silver Stonk's tokenomics is designed to benefit community, encourage holding and help develop the project.

6.2 Silver Stonks Redistribution

Fees are redistributed to holders, an automatic liquidity pool, and a treasury. Within the treasury, a portion is designated to be used for operations, community mining, and to be burned each quarter.

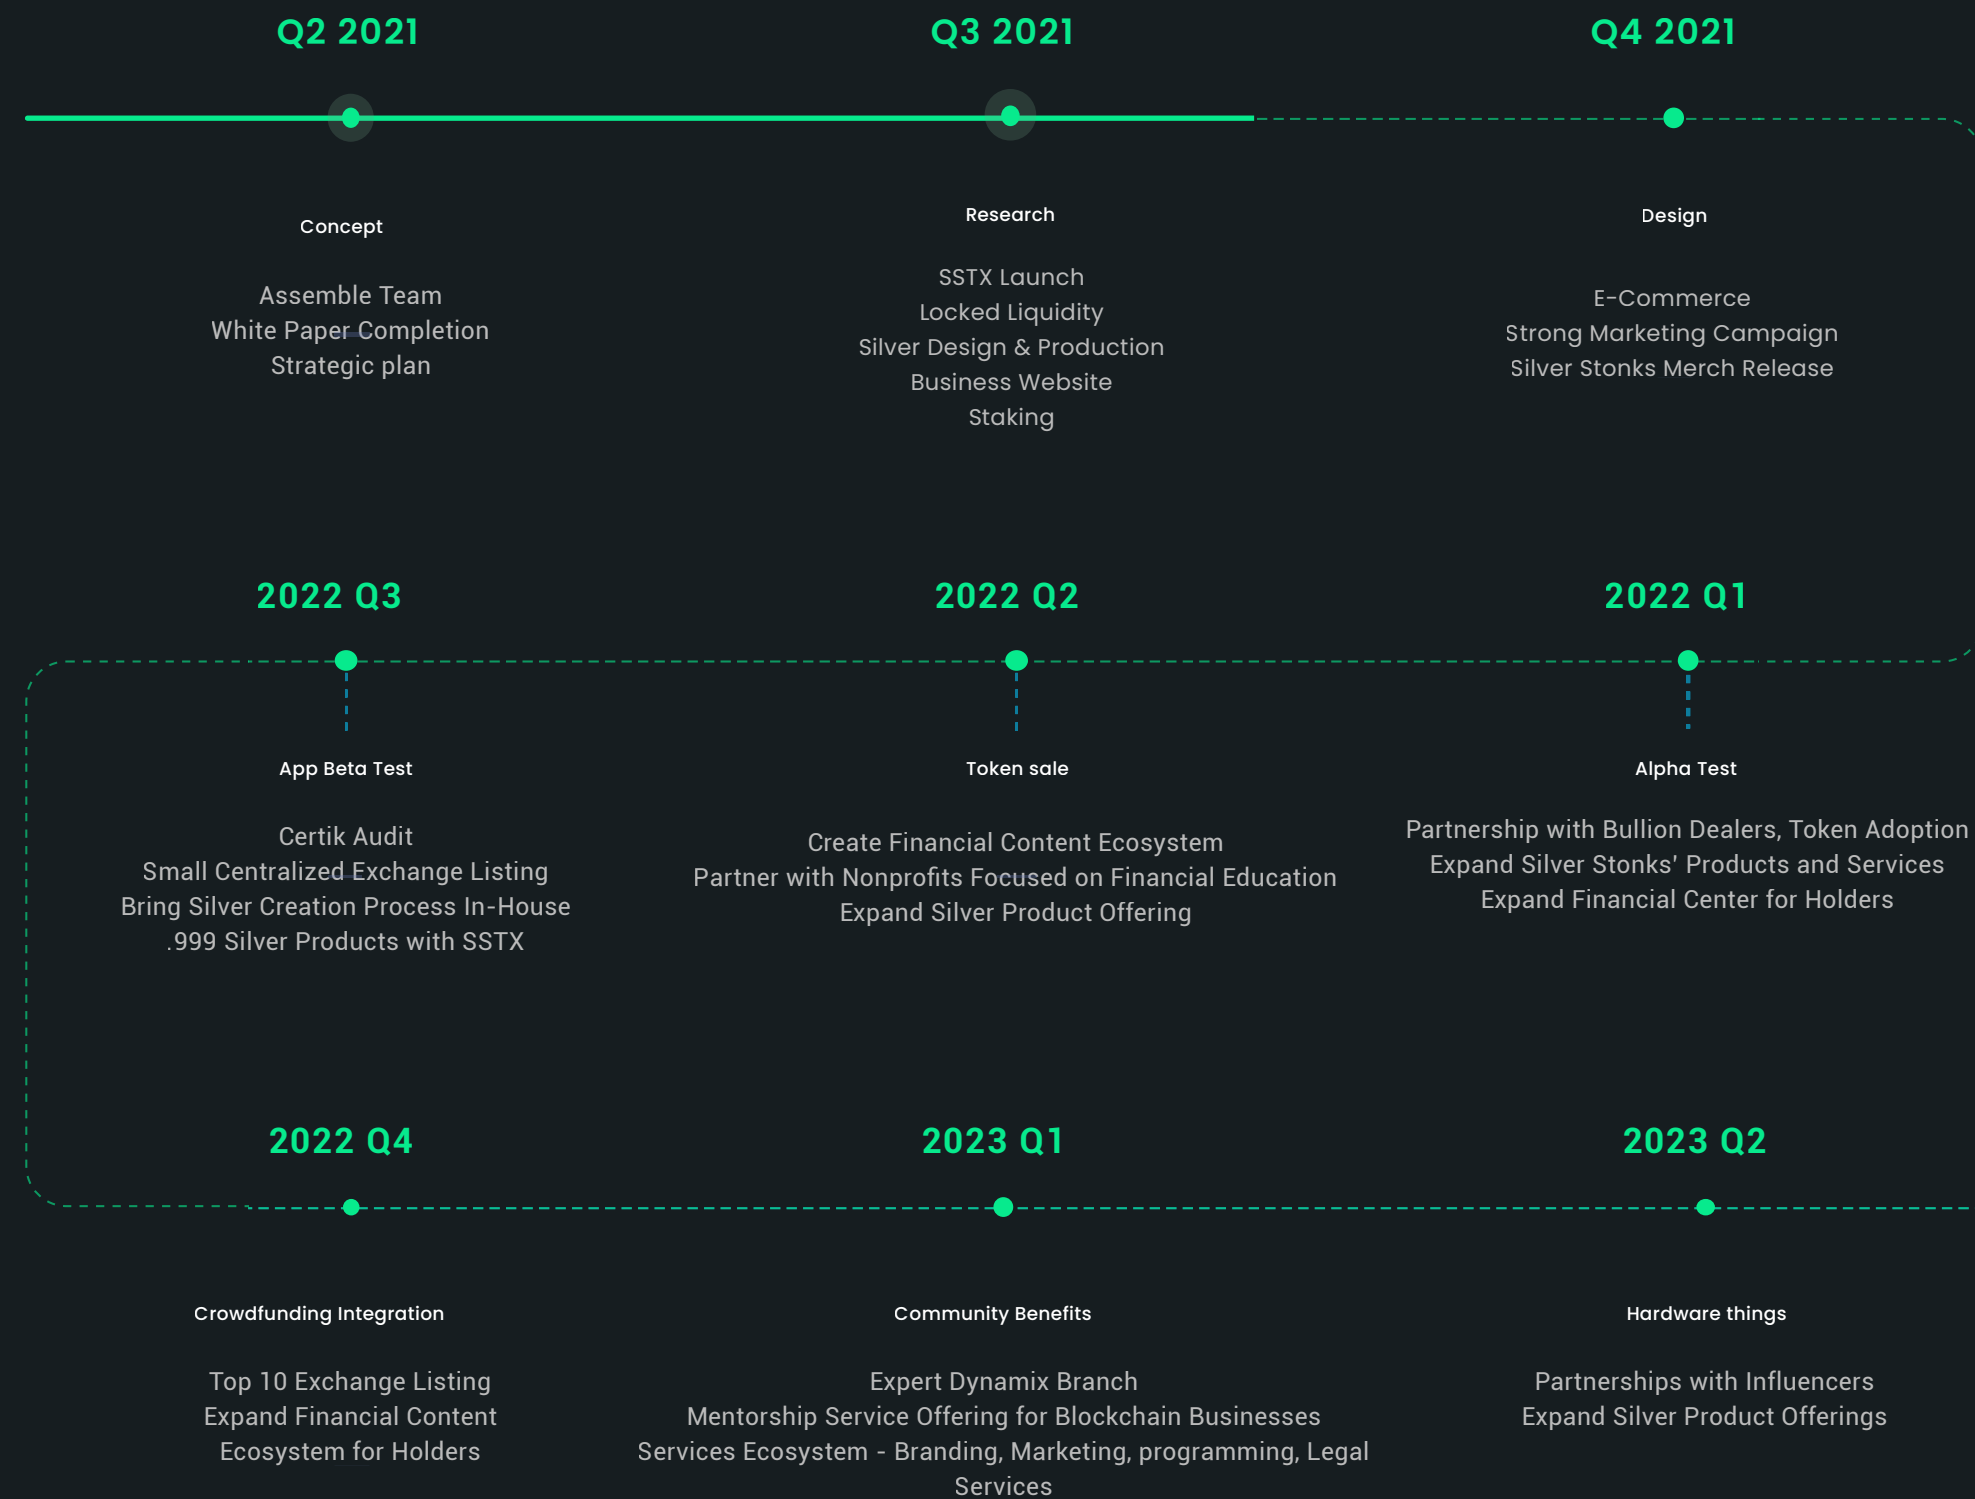

The background features a dense pattern of green leaves, likely from a tropical plant, with prominent veins. In the top-left corner, there is a white network diagram consisting of several circular nodes connected by thin white lines, forming a web-like structure.

07

ROADMAP

ROADMAP

Our team is working hard to reach our goals each quarter and grow our ecosystem to provide holders with increasing benefits.
