INTRODUCTION

Identifying better problem solving methods are the success of a well-planned project or concept. Following the most suitable lines of codes and implementing a perfect algorithm may result in feasible outcomes. As a result Proof-of-Stake (PoS) and Proof-of-Work(PoW) algorithms were came to the crypto world. Out of those many algorithms were deviated. Bitcoin is the first P2P digital currency and it uses the Proof-of-Work(PoW) algorithm.

Many people identify Proof-of-Stake as holder's coin. Generally holders can earn more coins by holding it for some kind of period. This shows how normal person can be differentiated from PoS and PoW.

Initially Staker(STR) will implements the Proof-of-Stake mechanism as an Ethereum Token. Holders of Staker can get revenues by holding STR for a period of time.

CONCEPT AND PECULIARITIES OF STAKER

WHAT IS STAKER

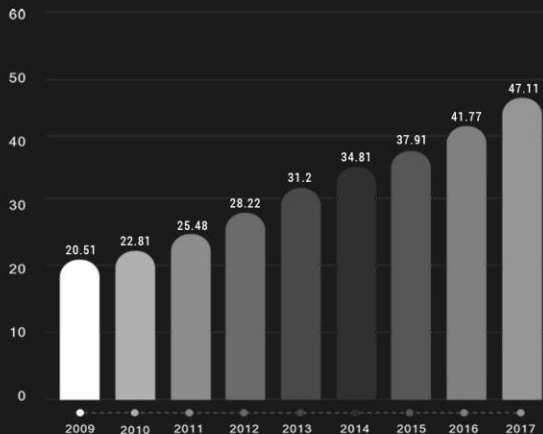

Staker is the world's first Proof-of-Stake smart contract token on Ethereum platform. It's based on the ERC20 Token Standard and implements all standard methods. As an Ethereum token, Staker first implements the Proof-of-Stake mechanism, meaning that every holder can earn some extra tokens just by holding Staker for a period of at least 3 days, greater than or equal to The Minimum Coin Age.

MARKET OVERVIEW

The global gambling market is currently experiencing rapid growth. According to the PricewaterhouseCoopers survey, the gambling industry grew at a CAGR of 9% over the past seven years, which is 3 times faster than the global GDP.

This trend is expected to continue until 2021, which is supported by such global trends as the development and penetration of new information technologies, economic growth in developing countries, the rise in real income, the recent easing of online gambling and betting regulations in a number of countries.

The growth of the Internet allowed hundreds of millions of people worldwide to play casino games, place bets on their favourite sports teams, and play poker without having to leave their homes. The evolution of mobile devices gave people the freedom to bet from virtually anywhere they can get an Internet connection.

Let's play a game,

A game?

"Yeah why not?" For a moment, just forget all of these trades, investments, complex curves and play a game to relax a bit.

But why should I play a game? I have so many things to do.

Because it can earn you money as well.

Okay sounds interesting. Tell me more about it

It's a simple dice game,

First of all you get 3 dices. Then you have to roll it simultaneously. Make sure it's a flat surface and if your dices get knocked or ran out of the surface you are

STAKER CEE-LO DICE GAME

This is how you win,

If you roll 4, 5 and 6 in sequence, it means you won without an argument.

This is how you lose,

If you roll 1, 2 and 3 in sequence, it means you loss instantly.

Is that all?

No! There are other ways of winning too.

Triples - Any three kind of same digit combinations are valid. Your combination must be higher than your opponent.

Triples - Any three kind of same digit combinations are valid. Your combination must be higher than your opponent

Point Method - If a combination includes 1st two dice has same die point but last digit has a higher value compare to the other, higher dice value owner wins.

The doubles do not count hence the higher dice value wins.

Sound interesting. But tell me how this can relate to a business?

Well it's simple, this is a very fast and quick learning game. We are bringing this game mechanism to the blockchain. So everything will be handling by smart contract addresses. Since you know about smart

STAKER WALLET

Like paper money and gold before it, there is the new possibility for buying, selling and exchanging value appeared with the digital currencies. For the first time in history, people can exchange value without intermediaries with greater funds control and low fees. Blockchain wallet is an instrument to store one or several kinds of cryptocurrencies. The wallet main function is to facilitate sending and receiving cryptocurrencies, giving balance ownership to the user.

With the Staker Wallet integrated into the Staker Games platform we are providing users with a new diverse interaction ways in the digital economy. This integration makes it easy for users to receive and send digital currencies, monitor exchange progress right inside the Staker Game platform. The Staker Wallet will allow users to retain full access to their balance in any cryptocurrency including Staker tokens. The multi-cryptocurrency wallet will offer not only standard operations of receiving and sending, but the possibility to use hierarchical deterministic wallets. These wallets allow users to generate an unlimited number of addresses and private keys from the same seed. This means that wallets can be easily backed up and transported to other wallet software with a twelve-word mnemonic phrase.

WHY STAKER

Contract Address : 0xBAE235823D7255D9D48635cEd4735227244Cd583

▶ Name	Staker
▶ Symbol	STR
▶ Decimals	18
▶ Type	ERC20
▶ Blockchain	Ethereum
▶ Max Total Supply	7,785,000 STR
▶ Initial Supply	1,785,000 STR
▶ Min Coin Age	3 Days
▶ Max Coin Age	90 Days
▶ 1st Year Interest	100%
▶ 2nd Year Interest	50%
▶ 3rd Year onwards	10%

STAKER STAKE INTEREST

YEAR	ANNUAL INTEREST	TOTAL SUPPLY AFTER
YEAR 1	100%	3,570,000 STR
YEAR 2	50%	5,355,000 STR
YEAR 3 - 7	10%	7,785,000 STR

The Max Total Supply of Staker token is set to 7.78 Million, but we just created 1.78 Million STR as the Initial Supply. The Max Total Supply will only be reached in about 7 years or a little longer at the set Staker interest rate. Once 7.78 Million is reached, no more Staker will be generated via PoS.

STAKER MINING

Staker holders are eligible to claim a staking reward if they have hold Staker for at least three days. The staking reward is proportional to the number of Tokens hold in the wallet and the length of time the coins have been hold. This value is referred to as coinAge, which is the number of coins multiplied by how long the coins have been hold (age). Older and larger sets of coins will have a greater coinAge. The staking reward is proportional to the coinAge.

However, once the staking reward is taken, the investor must start over with zero coinAge and must wait for three more days before becoming eligible for the staking reward. The coinAge reaches a maximum amount after 90 days in order to prevent a single large amount of coinAge from dominating the blockchain. This also means that the coinAge will never increase above the 90-day limit.

We estimate the staking reward rate for the first year at approximately 100% annually. For example, a person who has 100 STR and keeps that coin for one year will get staking reward of 100 STR in the first year. In the second year, the reward will be approximately 50% and in the third year and after, the staking reward is around 10%.

INITIAL AIRDROP OFFERING

There are 40 rounds of airdrops and 3 types of airdrop distributions.

1. Normal Airdrop - Free Airdrop for everyone and Rewards will be based on your bitcointalk account rank.
2. Special Hodlers Airdrop - This event will occur on a regular basis that will rewards people who holds and buy more tokens.
3. True HODLERS Airdrop - Receive only for users that kept 50% of total airdrops (EQUAL DISTRIBUTION - NOT BASED on BCT RANK)

ROADMAP

EXCHANGE LISTINGS

After the Airdrop, tokens will be listed on a number of global cryptocurrency exchanges. As the platform's trading turnover and the number of user requests from different countries increase, the number of exchanges the token is listed on will grow as well. The team aims to be listed on more than 12 global cryptocurrency exchanges.

Exchanges will allow token holders to instantly trade STR tokens for any liquid cryptocurrencies (BTC, ETH).

TEAM

SCATTER BARRAGE

CO-FOUNDER

Over 6 Years of experience in project management and one of the challenging role to be maintain in the STAKER project.

His feasible vision towards Staker emphasis developers and team members to trust in this execution

RAHIM SHAFRAZ

CEO

Have 5 years of experience in mobile gambling industry. He sees the potential of successful cryptocurrency projects. Shafraz is a blockchain project advisor as well as he holds a Masters degree in business investment management as well.

TATYANA MAHALINGAM

MARKETING MANAGER

Stakers' most enthusiastic character. Very optimistic and consist with unique methods of marketing skills to maintain a successful project. Stakers bounty campaigns and social media marketing will be handle by herself.
