⏁ TOPCHAIN 拓扑链

Global decentralized gaming community

Topchain is the world's leading brand in the gaming blockchain, reshaping the game industry structure with decentralized concept to create a global de-centralized gaming ecosystem. Through the topchain player community, topchain token and mining to solve the current gaming industry dilemma that are dominated by the giant and channel , and to build a multi-winner decentralized industrial structure.

In the topchain system, players are entitled more rights trough token and able to be the investor, policy maker and consumer at the same time. Game developers can reach the players directly to avoid dilution of the ownership, and access to millions incremental users in the topchain community at the same time; Topchain platform relies on the brand effect to access the world's best game products to achieve infinite loop value added.

The birth of the topchain means the change. Topchain will work with all the game enthusiasts around the world to establish a global decentralized game ecosystem where everyone can participate, decides and benefits.

CONTENTS

Problems in the gaming industry

Industry problem 1:Complicated process, low returns

In the gaming industry, "R&D——published——channels——players" ,Complicated process and high cost, shares of developers has been diluted thus low

2:Copyright violated by giants monopoly

Tencent, Netease and other giants monopolies the gaming products and caused copyright has been seriously violated.

Players problem 1: Lack protection of players' interest

Players at the bottom of the industry have low participation in the games they play and no power and speaking and their virtual assets are not protected.

## Players problem 2: Security risk of the server

Centralized mode of server have security risk and hard to protect the virtual assess of the players under attack.

Above problems limit the development of gaming industry.

Topchain , Open the new era of the gaming industry

Topchain applies the decentralized block chain technology in gaming industry to create the world's first decentralized brand. By excluding monopolies and intermediate links, game development directly assess to players and serve to players. Game players determined the success or failure of the game product by democratically voting.

Topchain Three Consensus

Topchain have changed the gaming industry because of the three key innovations: Topchain community, Topchian consensus and mining.

Topchain Consensus

The establishment of the topchain consensus needs to initiate voting to all nodes to raise a certain number of topchain tokens. Decentralized topchain consensus makes the game easier on the go and will prevent third parties to dilute the value of the products.

Topchain Community

Topchain Community is a decentralized gaming community that is the foundation of the entire topchain game ecosystem.

Mining

Miming will bring token to the players, different from the traditional mining workload , Topchain mining not only guarantee the entertainment essence of the game but also establishes a mechanism of the participation proof.

Three Core Value of Topchain

Any decision in the community, such as whether the game is online or not requires a topchain consensus

The establishment of the topchain consensus needs to initiate voting to all nodes to raise a certain number of topchain tokens.

The 40% token needs for consensus will be provided by the originator, the remaining 60% is the player vote.

The embodiment of platform value

Topchain-Three core values-Remodeling player value

Topchain allows players to invest, make decision, promote and consume, thus become the dominant force in the gaming industry.

（1）players may use token to transfer virtual asset in different game products and obtain token benefit through positive game behavior

（2）Plyers invest token in the product on-line voting, and share profit when the game go alive. Thus players upgrade from consumers to investors.

（3）Players able to interact with R&D team and explore new ways to play. When the product is not well-run, players have the right to vote offline.

（4）Players can organize their own product promotion activities to become a promoter of the game products and get token rewards.

Topchain-Three core values-Remodeling player value

Under the current game system, players have low participation in the game products and they have no power of speaking. They can only passively accept the overlord clauses of monopolies and

Topchain-Three core values- Value R&D inputs

Under current model, most game developers are faced with great survival predicament. Apart from the pressure of monopoly giants and infringement, bloated intermediate channels have greatly diluted the value of the products.

Express to Players

Topchain offers an express channel to players for developers ,

To operate game online, it only requires developers and players to achieve topchain common agreement in the topchain community, there is no middle channel to reduce product share.

Protect Product Copyright

The topchain itself is open to the public and impossible to falsity, it effectively protect the brand copyright.
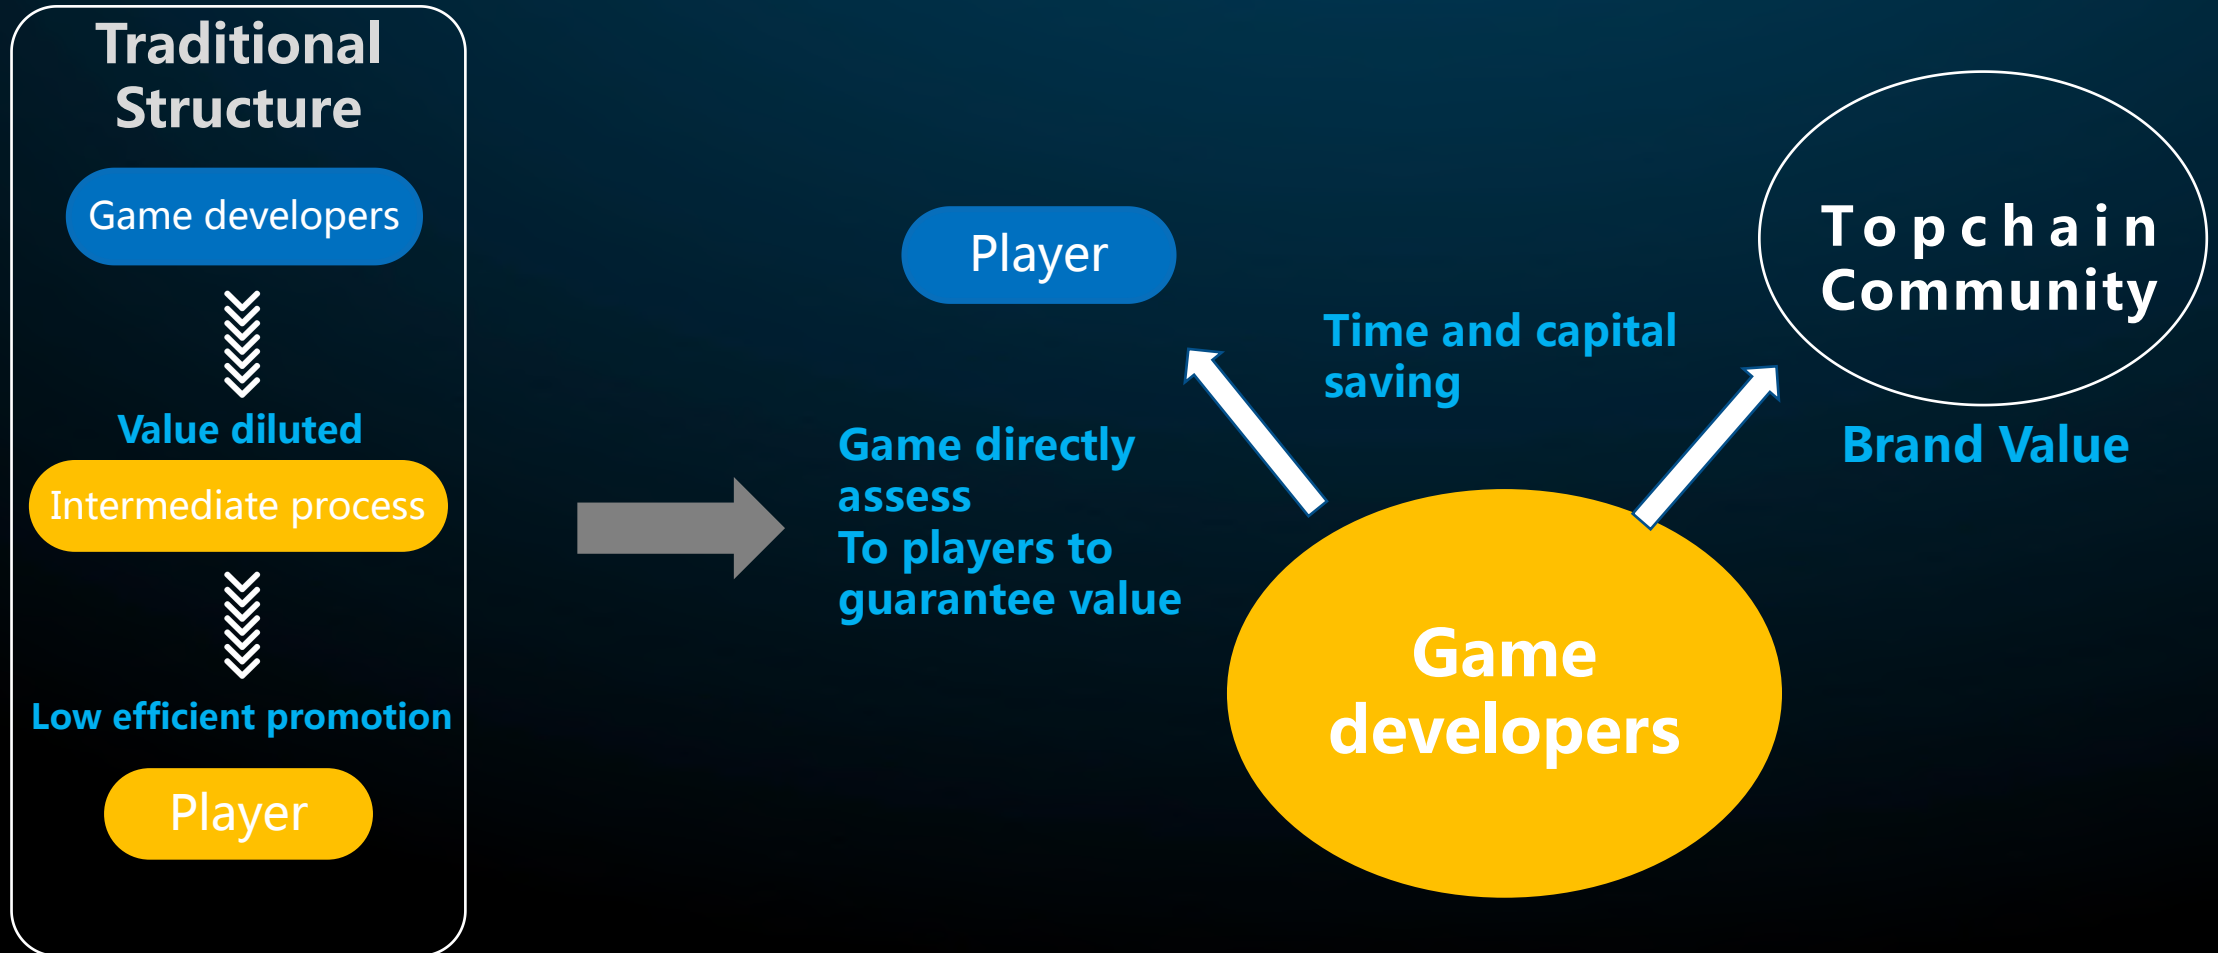

Users Assist to Improve the Game

It increases the number of users and improves the quality of the product with large numbers of users join the community.

Topchain-Three core values -The embodiment of platform value

As a bridge between the user community and R&D team, the value of the topchain brand is to reshaping the gaming industry, where everyone can win in multiple ways trough decentralized technology. No single company can dominate and control the platform as it was shared between all players and developers for free. Everyone can promote the platform
Build New Sequence

Decentralized top chain, removed complicated middle channel, build free economic system with "intelligent agreement + topological pass" .

Brand Effect

It uses the way of topological common view to manage gaming products , in order to achieve top chain platform circulating its value.

Attract Large Numbers of Users

It uses high quality gaming products to attract large amount of users to join top chain community, farther increase top chain brand value.

Token Distribution

Distribution of TOPC

Token Name: Topchaincoin (TOPC)
TOPC is the key medium of exchange within the Topchain ecosystem.
The total TOPC is 2.1 billion, it will distribute like following:

PE& angel investor

To ensure the worldwide infrastructure of the top chain project and docking the game products in the early stage, some of the token is used for PE.

Team

Will use for the daily team operation and team members' salaries, released in two years。

Community

Mainly use to reward positive behavior in top chain community. When the product go online, the developers will entitle tokens equal 10% of share capital based on top chain consensus. Community will also reward players and third party for its volunteer promotion actives.

promotion

Mainly use for the promotion of the early stage game products in top chain community and top chain platform. Including global fair, press release, players party and roadshow.

Topchain mining

Token will come from mining through games. The output rules will be:50% token of the total mining token in the first year,25% token of the total mining token in the following year, and 12.5% token of total mining token in the third year then cut by half each following year. 10% of mining output token will distribute directly to the community in terms of smart contract, in order to reward for the positive behavior in the community.

Create global
Decentralized
gaming ecosystem

Create global decentralized gaming ecosystem

An unprecedented global decentralized gaming ecosystem for everyone to involved, everyone decides and everyone benefits.

connect thousands games in the world

Connect global players

Create worldwide game community

Create global decentralized gaming ecosystem

Topchain will enter Japan, South Korea and Southeast Asia market as well as Europe, US and other area. Together with world-class developers and players to promote topchain globally.

Φ Create global decentralized gaming ecosystem

Topchain- A premium global block chain brand will completely change the existing pattern for the game players。

Through topchain community, high quality game, multi-user topchain consensus mechanism and it's cross-game, cross-regional, cross-chain, cross-platform features, will show the world a community that has deep interaction and binding between the games and players.

While player get rewards from the game, the consensus principles of the platform will protect players' rights; Game developers can not only benefit from waiver of the intermediate cost but also access to a large number of high-quality users. With the widespread popularity and value of topchain platform, a globally decentralized game ecosystem that everyone participates, everyone decides and everyone benefits will stand from the crowd.
