TRXC Token Sale

TRXC is an ERC20 token based on the largest and most well-established, open-ended decentralized software platform; Ethereum. the ERC20 token that serves as a social digital currency with all major social network to make the process of sending and receiving money rewarding for everyone.

An ERC-20 token is a smart contract which implements ERC20 interface. Smart contract is a program written in solidity programming language and is being executed in the Ethereum Virtual Machine of the Ethereum blockchain. Smart contract guarantees that the TRXC Token allocation plan will remain unchanged, it will be impossible to create more than 1,000,000,000,000 tokens. It means that after being listed in an exchange the token's price will depend exclusively on market demand and not on technical manipulations.

Token distribution

There will be a total supply of 1,000,000,000,000 TRXC tokens. No more tokens will be issued following any unsold tokens will be burned.

All funding raised from the token sale will go into the development of the TronClassic platform and putting our marketing efforts to help the token reach the vision we have for it.

TRXC Token will be distributed among sectors which will ensure the growth of the company and benefit investors.

	Public Token Sale	70%
