

Yearn Shark Finance

White Paper

Yearn Shark Finance Is DeFi project with It's Own Decentralised YSKF SWAP Exchange and Staking Platform.

YSKF SWAP Exchange & Staking App Launching Soon.

Summary Of Whitepaper -

1. Introduction of YSKF
2. Features of YSKF
3. How to Earn with YSKF
4. Reasons to Buy YSKF Token
5. YSKF Token Details
6. Roadmap
7. Social Media
8. YSKF Token And Smart Contract Details

Introduction Of YSKF

1.1 What Is Yearn Shark Finance

Yearn Shark Finance Is DeFi project with It's Own Decentralised YSKF SWAP Exchange and Staking Platform. YSKF SWAP Exchange & Staking App Launching Soon.

1.2 What Is YSKF

YSKF is the core token of Yearn Shark Finance Ecosystem . It is used in governance of the protocol and in various Features .

1.3 How to be a Sharkers (mean Staker Of YSKF)

To be a Sharkers you only need register an ETH address and hold the YSKF tokens in one of the liquidity pools we will be setting up.

1.4 What About Lock Periods In Stacking Pool

Lock periods will be short durations for maximising of market activity. We will Create 120 hour lock pool, 7 day lock pool and 30 day lock pool with differing yield values for each. You will generate income from day one and you will be able to trade or sell your tokens without any limitation against all YSKF/Yield Pool Pairs.

Yield Farming

2.1 What Is Yield Farming

Yield Farming is an up and coming popular method for cryptocurrency owners to gain passive income. It involves taking advantage of various incentives rewards for locking up (or staking) different cryptocurrencies. This whitepaper focuses on the Yearn Shark Finance yield farming mechanism for the YSKF token which we hope will become one of the highest performing yield farming pools

2.2 What is A Yield Staking Pool ?

Put simply, staking is the process of keeping funds in a cryptocurrency wallet (or staking pool) to help the underlying proof-of-stake blockchain network (for a particular project) operate more efficiently and securely.

A stake represents a voting right in a particular project that is earned after purchasing a minimum amount of coins. This means the more coins we hold in a staking pool, the more voting rights we obtain. And since holding the coins helps the underlying proof-of-stake network operate more efficiently and securely, a reward is paid out.

Comparing and contrasting staking vs traditional passive investments

Conceptually, the process of holding tokens and then being rewarded for holding them resembles certain passive-income instruments found in traditional finance, such as bonds or preference shares for instance. But fundamentally they are very different.

1.5 Why Should we buy YSKF ?

There Are Many Reasons Why You Should Buy YSKF ?

- **CREATIVE BUSINESS IDEA** : An all in one project that will not disappear and fall. Will be backed up with professional human resources and powerful project.
- **TRAINING TO EMPLOYEE** : Several cryptocurrency companies ranked 10 in cmc who support us from behind will help with project management
- **BEST STRATEGY** : All Unsold token in public and private sale will be burned. Token growth by listing on top 1 big exchanges and auto burning system that will decrease total Supply and increase Growth.
- **BEST TEAMWORK EVER** : Our team is highly experienced in software engineering and projects development.
- **BUSINESS PRIVACY** : User security in securities using staking pools, apps, and payments will be guaranteed safe and personal data will not be known even to our staff.
- **BUSINESS IMPLEMENTATION** : To achieve maximum results we will focus on utility tokens and listing on big exchanges.

At Last DYOR Before Buying Any Utility Token.

Stacking

3.1 What is A Yield Staking Pool ?

It will not be necessary to have any knowledge of hardware or software to start earning money through cryptocurrency, nor will it be necessary to lock tokens or deposit them in wallets of which you do not have the private keys, neither you will need to invest in expensive hardware or pay for server maintenance.

3.2 What does staking mean ?

Put simply, staking is the process of keeping funds in a cryptocurrency wallet (or staking pool) to help the underlying proof-of-stake blockchain network (for a particular project) operate more efficiently and securely.

A stake represents a voting right in a particular project that is earned after purchasing a minimum amount of coins. This means the more coins we hold in a staking pool, the more voting rights we obtain. And since holding the coins helps the underlying proof-of-stake network operate more efficiently and securely, a reward is paid out.

Comparing and contrasting staking vs traditional passive investments

Conceptually, the process of holding tokens and then being rewarded for holding them resembles certain passive-income instruments found in traditional finance, such as bonds or preference shares for instance. But fundamentally they are very different.

Staking rewards are not derived from earnings

The reward that is received in the process of staking is actually a proportion of the limited pool of tokens. It is not derived from the companies profits or earnings

3.3 What is Potential of YSKF Staking ?

DeFi's so-called yield farmers are putting their capital to work to earn yield from protocols such as Compound, Synthetix, Balancer, and Curve.

Here are some of the things that can really help when understanding how to yield farm with staking rewards.

Yield farmers are earning as much as 100% APR on popular stablecoins on a good day in the field.

On a bad day, losses can be steep, but the potential for big profits has drawn hundreds of millions into DeFi in the past week.

While depositing capital into a smart contract to earn a return is nothing new to DeFi, yield farming has become more attractive in the recent weeks as protocol teams are increasingly incentivizing liquidity providers (LPs) by distributing their native token.

That means traders can get the hottest tokens on the block in addition to interest on their deposits.

Yearn Shark SWAP Exchange

4.1 What is Yearn Shark SWAP Exchange ?

This Exchange will be an automated market making exchange interface similar to UNISWAP and SUSHISWAP, this will be different in the way that it enables token liquidity providers to add a maximum impermanent loss threshold to the smart contract when they add liquidity, essentially ensuring trust that they won't lose 100% of their assets for supporting a project. To be a user of Yearn Shark Finance Swap exchange you only need to integrate Metamask once and add your YSKF Tokens to your dashboard wallet.

Yearn Shark Finance SWAP exchange is planned for testing December, 2020.

We aim to have it operational by Q1 of 2021. With community driven research and development to help shape the future of the exchange platform

Stacking App by YSKF

5.1 What Is Stacking App ?

In This app you can Stake Crypto In Various Pool, (there will be 3 Pool In App) And In Every Pool There Will Be 2 Pair Of YSKF/ETH and YSKF/USDT

This will be the easiest and most secure way to earn passive income in crypto !

Your profit goes from the cryptocurrency networks powered by Proof-Of-Stake and masternode technologies. We are securing those networks, and you are earning from it !

5.2 Features Of YSKF Stacking App ?

(i) You Can Instantly Swap YSKF To Supported Crypto - ETH, USDT

(ii) You Can Also Instantly Buy YSKF At Exchange Price There By Supported Crypto.

- Fully automated staking & masternode pool
Deposits, rewards, and withdrawals proceed instantly. You are here to stake, not to wait!
- Rewards compounding
Every reward is reinvested instantly. It makes your portfolio to grow faster.
- No lockup period
Deposit and withdraw your crypto at any time and in any

Roadmap and Distribution

6.1 Roadmap Of YSKF ?

6.2 Mechanism Of Token -

45% Private & Public Sale

--- 20% Private Sale

--- 25% Public Sale

18% Airdrop and Bounty

12% Marketing And Development

10% Team and Testing Purpose

15% Locked For Listing Liquidity

6.3 Distribution Of Token

The distribution of YSKF token was specifically tailored to

ensure a strong community was built. The benefit of this project is that the even distribution creates a stability in the AMM exchange.

We will be burning all of the left remaining presale token at the end of presale.

About Contract And Token Details ?

- Network: Ethereum Blockchain
- Name: YearnShark.finance Token
- Symbol: YSKF
- Decimals: 18
- Total Supply : 15,000 YSKF
- Contract Address : 0x8ec4e89f52c361-
fea535e10ddf3fc6dd6b3e9262

YSKF PRIVATE SALE

Start : 19 November 2020 - 08:00 (UTC+0)

End : 23 November 2020 - 08:00 (UTC+0)

Minimum Purchase : 0.50 ETH

Number of tokens for sale : 2000 YSKF

Tokens rate : 1 ETH = 10 YSKF

Soft Cap : 200 ETH

YSKF PUBLIC SALE

Start : 25 November 2020 - 08:00 (UTC+0)

End : 02 December 2020 - 08:00 (UTC+0)

Minimum Purchase : 0.1 ETH

Number of Tokens for Sale : 2500 YSKF

Tokens rate : 1 ETH = 8 YSKF

Hard Cap : 300 ETH
