YEARN FINANCE MANAGEMENT

Yearn Finance Management White Paper V1

OCTOBER 2020

Introduction

YeFiM is a fork of Yearn Finance with its own YeFiM token, designed to meet the demand for financial innovation and improve the efficiency of the financial system using Defi and blockchain technology.

The team is tackling the challenge of creating a decentralized financial ecosystem by offering a full range of Defi-based products and solutions.

The YeFiM platform will integrate Defi's various products and solutions into a single ecosystem, allowing consumers to conduct financial activities in a cost-effective and reliable way in one place. It is important to note that in order to ensure complete decentralization within the ecosystem, voting will be implemented, which gives the community full authority to decide which distribution the operating group deserves.

Key Products

YF Management offers the following products and solutions, which include:

YeFiM Token:

The YeFiM token is the proprietary token of the YF Management ecosystem, thanks to which it allows processing transactions as an exchange token, and also allows peer-to-peer exchange and value transfer. The YeFiM token is already listed on Uniswap and will be listed on CoinTiger and Hotbit from October 10.

It is important to note that the liquidity of the YeFiM Token has been locked for a year, which can be tracked at the following: https://info.uniswap.org/pair/0x8f30590adf705e5a355c6b1adc6c4f527b71c46a

YFM Token:

YFM Token is a token of the YeFiM ecosystem, this token is given to the holders of the YeFiM token, distribution will be carried out randomly.

The YFM token is already listed on Uniswap.

It is important to note that the liquidity of the YFM Token has been locked for a year, which can be tracked at the following: https://info.uniswap.org/pair/0xe5031fd9edcd3c2d723e1d61ae8b47dc1e5fbc99

YFM-Farm:

YeFiM-Farm offers cryptocurrency holders to pool their assets together to provide a large pool of liquidity for everyone who wants to exchange this asset, as a return, he receives a lucrative reward straight into the wallet.

YFM-Stake:

It is a modern platform that allows YeFiM and YFM token holders to store their assets in a specially designed contract. The storage percentage is set automatically depending on the price of the underlying assets and the number of assets in the pool.

YFM-Borrow :

YFM ecosystem is borrowing - Borrowers can borrow assets in an overcollateralized (perpetual) way, selecting USDT (Tether), Ethereum (ETH), or DAI, and earn YFM as a reward for using the protocol.

YFM-Vote :

YFM-Vote offers decentralized platform that allows community to perform on-chain voting. All this voting data is record on blockchain which acts as a decentralized, immutable ledger, leaving no place of bureaucratic manipulation or rigging.

YFM-Vault :

YFM-Valut is a protocol that automates yield farming. It uses AI and BigData to look for innovative farming strategies, with the objective of bringing maximum yield to the community.
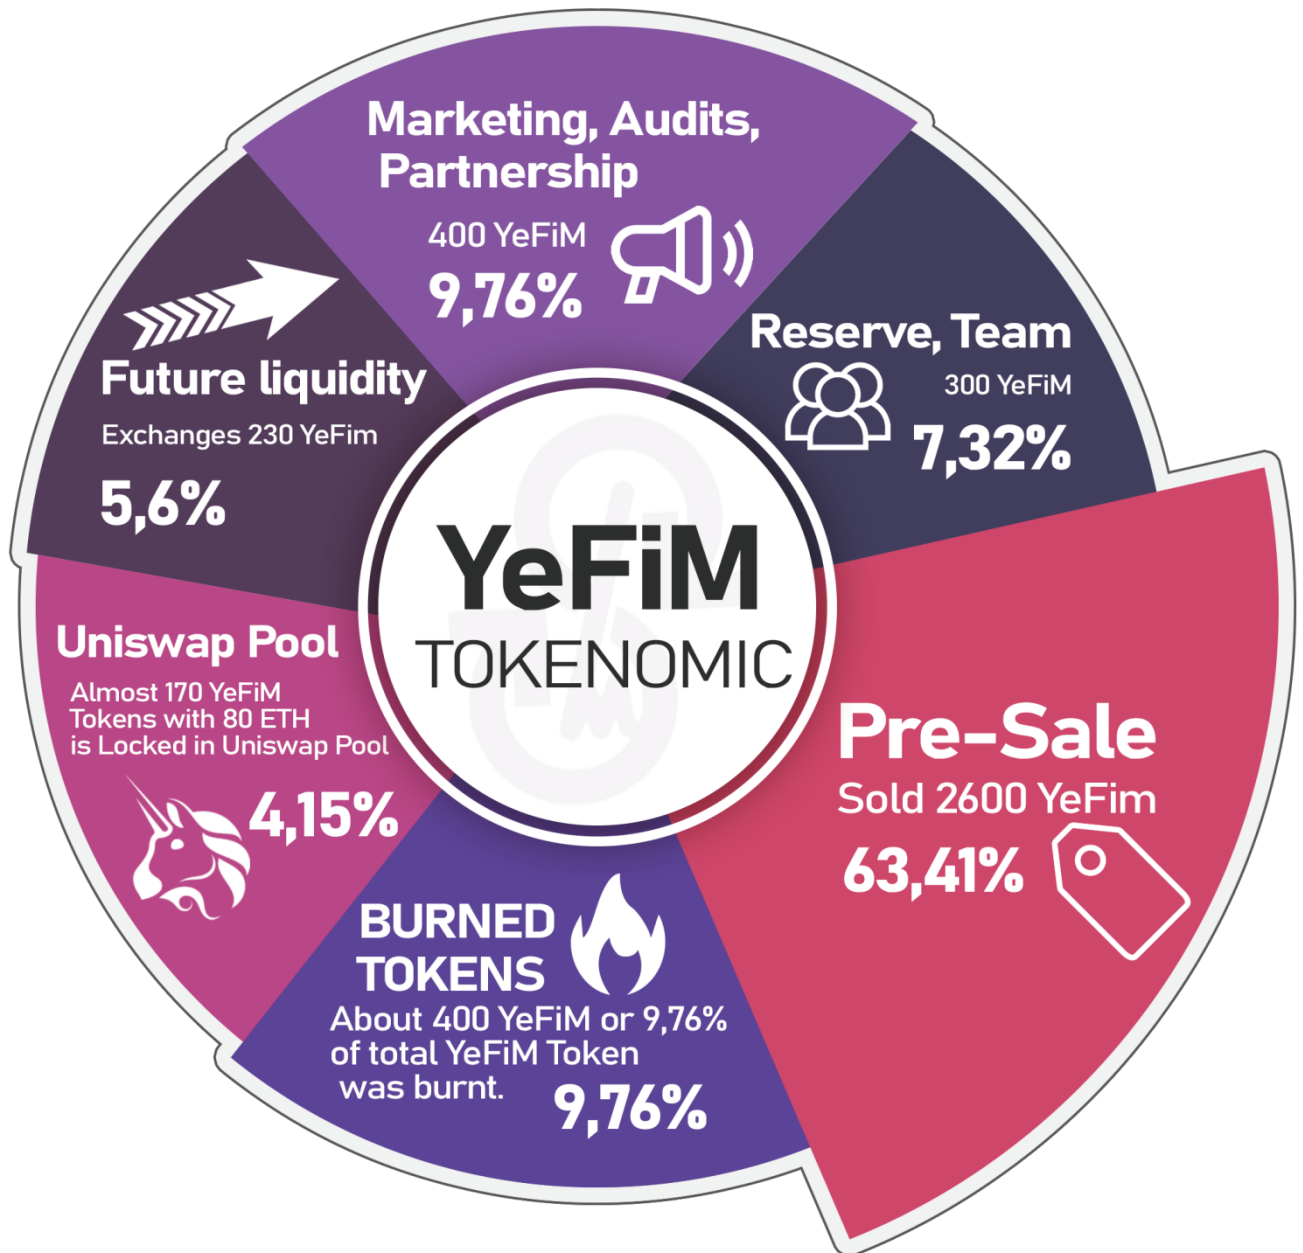

Standout Features

One-Stop Platform: A one-stop platform for all sorts of Defi products.

Decentralized Governance: With deployment on the blockchain and tokenization enabled, the YF Management offers a decentralized business model.

Stake: Unique strategy for calculating the stake percentage.

Tokenization: Enabling businesses to tokenize their businesses using the native YeFim Token

Security: All transactions in YF Management ecosystem are secured by smart contracts

Token Utility: YeFiM Token has native utility derived from acceptance of the token in all of the products and services within the YF Management Ecosystem.

Unique and futuristic: The products offered by YF Management and its business model innovative.

Liquidity offered: Liquidity of the token offered through swapping and exchange listing

Problems we solve?

Security issues in finance tackled by decentralized blockchain based financial model

Role of centralized entities removed through dis intermediation and smart contracts based decision making

Manipulation by controlling authorities and single point of failure issues tackled through decentralized governance and distributed architecture

Liquidity in trading activities offered through instant swapping and decentralized market making

Tokenomics: Token Allocation

The pie-chart below gives an overview of how are tokens allocated within the YF Management ecosystem.

Marketing, Audits, Partnership
400 YeFiM
9,76%

Future liquidity
Exchanges 230 YeFim
5,6%

Reserve, Team
300 YeFiM
7,32%

Uniswap Pool
Almost 170 YeFiM Tokens with 80 ETH is Locked in Uniswap Pool
4,15%

YeFiM TOKENOMIC

Pre-Sale
Sold 2600 YeFim
63,41%

BURNED TOKENS
About 400 YeFiM or 9,76% of total YeFiM Token was burnt.
9,76%

Roadmap

The chart below gives an overview of the multiple milestones the YF Management ecosystem will achieve with the passage of time.

2020 Q2	2020 Q3	2020 Q4	2021 Q1	2021 Q2
Yearn Finance Management Planning & Development	- Yefim Pre-sale - 1 Marketing campaign for Yearn Finance Management	2020 Q4 Exchange Listing at: - CoinTiger - Hotbit - Probit - Top 10 CMCExchange - Uniswap - Balancer - Coinmarketcap - CoinGecko - CoinPaprika	Development of Mobile apps for Staking, borrow and vote.	Marketing campaign for Yearn Finance Management.
